Qaqet Longitudinal Corpus: Data YDS

02;10	LongYDS20160324	0:56:54	The family is in the garden, hanging clothes over the fence to dry. When it starts to rain, they move into the hut and prepare food (cooking cassava etc. in the fire, and peeling pitpit) and interact with each other. In between, the two older children play with their baby brother, trying to elicit sounds from him and reacting to his sounds. In the middle of the recording, ZFM arrives and from then on, almost all the interaction is between ZFM and the adults and/or ZFM and ZEP (soothing the crying baby). There is some interaction directed at YRA: he knocked over the camera, got scolded and sent away; after a while, the grandmother tries to comfort him and entice him back. 02;10	LongYDS20160405	1:00:03	YDS is alone in front of the camera and digs. The adults have an animated whispered conversation behind the camera (barely audible, not transcribed), and only occasionally interact with YDS. YDS tries to catch their attention a few times, but usually not successful. YRA passes by at some point and briefly interacts with those present. ZEP (and possibly another baby) are behind the camera and are occasionally audible (not segmented).	YRA (04;01) ZEP (00;04) AMT (mother) Unknown (adult) Unknown (child)	glossed

02;11	LongYDS20160418	0:58:06	The children are in the garden where they attempt to build a fairly large fence and a house (out of wood, poles and corn leaves). The children mostly play amongst themselves, and there is little interaction with the adults behind the camera. Throughout the recording, the mother is in the background and scrapes taro, and sometimes interacts with people passing by. Ca. 20 minutes into the recording, the father and an unknown woman join her behind the camera, and they start a largely unintelligible conversation. In the second part of the recording, the unknown woman interacts with a baby behind the camera, making sounds at the baby and talking in a high-pitched voice. 03;00	LongYDS20160612	0:59:51	The three older children look through a picture book and talk about the pictures. The mother sometimes joins in, but mostly the children interact amongst themselves; and the mother interacts with the baby. Later, the children eat and talk about their shares of the food. At some point, the boys leave to fetch water, and YDS is left alone; she eats her food, plays a bit with the baby, and sings to herself. 03;01	LongYDS20160710	1:00:44	The children sit near the fire and play with each other, and sometimes also with the baby. The mother, ZVI and ZFM are engaged in various activities: playing guitar and singing, cooking, looking after the baby, running errands. In the first half, there is little talk among the adults, and little interaction of the adults with the children. In the second part, further people join the group and there is considerable conversation going on in the background (mostly unintelligible). The children rarely interact from this point onwards. At some point, YRA leaves to collect pots and YDS essentially talks to herself from then on (isolated words, context unknown, largely unintelligible). The video image is very dark (filmed against the light of the open door); sound of guitar/singing, boiling water and background conversation overlay voices of children.
